GitHub

Adobe Photoshop

Adobe Illustrator

Adobe Premiere Pro

Accounting

## Software

Visual Studio Code

Git Bash

MYOB

Xero

## Coding Experience

Completed all 24 weekly coding challenges in my course with an average of A grade. Coding challenges include creating

- Mobile responsive websites
- Web games using HTML, CSS and JavaScript libraries.
- Train scheduler that updates itself every minute using Firebase and setInterval timers
- A web app that pulls random gifs of a user defined subject matter using API calls through ajax
- Command line node app that takes entertainment-based parameters from users and retrieves songs, events and movie information from APIs using axios.
- A location and venue based social platform, Feed Me, that caters to the engagement of fellow foodies with each other and the restaurateur (working in a group of 4),

Performed over 200 commits on GitHub in the duration of the course.

## Visuals Experience

Use Adobe Illustrator to create art vectors and to digitally colour kids drawing for reproduction in my business.

Use Adobe Photoshop to

- Digitally smooth out deformities on artwork
- Apply colour correction from photos of artwork submitted in less than ideal lighting conditions
- Decrease the impact of unwanted shadows
- Cut out any unwanted elements in a photo

Used Premiere Pro to create and edit Facebook Ad campaign for my business complete with soundtrack.

## Work Experience

Worked mostly as an auditor/accountant from 2001 to 2017 for some of the biggest chartered accounting firms, including PwC and Deloitte. Most recent corporate role was with SP AusNet, as a project accountant. Used to working with tight deadlines and managing work schedule over multiple jobs simultaneously. Enjoyed problem solving and analytical review. Please refer to Linked In for full details.
